

Mark Johnston

Group Chief Engineer

Marshall Aerospace & Defence Group

Mark joined Marshall Aerospace and Defence Group in 1984 as an apprentice and has gained over 35 years of experience in the aerospace business with a diverse knowledge of the industry demonstrated across the whole spectrum of aerospace disciplines.

Over the years, Mark has worked on many UK MOD projects seeing the Tri-Star both in and out of service and working on many associated modifications on that aircraft throughout its life. Similarly Mark has worked on both the C130K and J platforms for a variety of customers.

Mark was appointed Engineering Director in 2013, following his many achievements here at Marshall. These included roles such as Chief Engineer responsible for projects such as the A400M Flight Test Bed and the Boeing 747 Auxiliary Fuel Tank. He has also held key Engineering Functional roles of Head of Mechanical and Fluid Systems, Head of Structural Design and was Chief Designer for four years.

In 2018 Mark became Group Chief Engineer, focussed on governance and safety and working closely with Stuart Hossack the Engineering Director on the capabilities of our Engineering team.
